**Rolls Prices are calculated by the square inch
 Call for current pricing!**

Actual filter frame size will follow industry standard.

1" frames will be 1/4" undercut.

2" frames will be 1/2" undercut

Example: 12 x 20 x 1" will measure 11 3/4 x 19 3/4 x 1"

Example: 12 x 20 x 2" will measure 11 1/2 x 19 1/2 x 2"

Custom sizes are also available; please specify the EXACT dimension that you want the FILTER FRAME to ACTUALLY measure.

* Many air return grills may have obstructions such as stop tabs, rivets and screws. You may want to make sure that you you take your measurement from in between these objects and subtract 1/4", so that the frame will fit in between them you put it into place. The best fit will be to remove the large headed screws and replace them with flat headed screws.

* Always open the air filter grill to make the measurement, do not assume the inside measurement is the same as the outside.

* FSM frames are made of galvanized steel and will not bend or buckle.

* Take your time. Get it right, you'll never have to do it again, our frames will last you a lifetime!

"Thank You For Your Order"

Only Cash, Checks or Money Orders accepted!
